Dear Landowners,

Rural Water District #3 Otoe County, NE plans to provide substantial system improvements and expansion of the system in order to meet the needs of the area now and in the future. Due to water quality concerns, such as nitrates and manganese in water supplies, and our long term goal of sustained water quality, the District is conducting a public meeting to discuss new transmission main routes and future service area expansions.

We request your attendance at this public meeting to be held on Thursday, July 16th at 7 p.m. at the Talmage Community Building, 404 Main St., Talmage, NE.

Two immediate need areas driving some of the improvement projects are the Villages of Talmage and Burr. Approximately \$20 million will be invested in upgrading the system, to include these specific areas, and the funding for these improvements does not cover easement costs. At this meeting we will discuss the potential route for water mains and potential easements on your property for the pipeline. We would appreciate your attendance at this meeting.

Sincerely,

Rural Water #3 Otoe County, NE
Board of Directors
